EASA AD No.: 2012-0073

AD No.: 2012-0073 Date: 30 April 2012 Note: This Airworthiness Directive (AD) is issued by EASA, acting in accordance with Regulation (EC) No 216/2008 on behalf of the European Community, its Member States and of the European third countries that participate in the activities of EASA under Article 66 of that Regulation.

This AD is issued in accordance with EC 1702/2003, Part 21A.3B. In accordance with EC 2042/2003 Annex I, Part M.A.301, the continuing airworthiness of an aircraft shall be ensured by accomplishing any applicable ADs. Consequently, no person may operate an aircraft to which an AD applies, except in accordance with the requirements of that AD, unless otherwise specified by the Agency [EC 2042/2003 Annex I, Part M.A.303] or agreed with the Authority of the State of Registry [EC 216/2008, Article 14(4) exemption].

| Type Approval Holder's Name: HPH spol. s r.o. | | Type/Model designation(s): Glasflügel 304 CZ |
|--|--|--|
| TCDS Number: | EASA.A.030 | |
| Foreign AD: | Not applicable | |
| Supersedure: | None | |
| ATA 27 | Flight Controls – Elevator Control Rod in the Vertical Fin – Inspection / Replacement | |
| Manufacturer(s): | HPH spol. s r.o. | |
| Applicability: | Glasflügel 304 CZ, Glasflügel 304 CZ-17, Glasflügel 304 C all serial numbers (s/n). | |
| Reason: | A broken elevator control rod in the vertical fin on a Kestrel sailplane has be reported. | |
| | The technical investigation revealed that water had soaked into the elevation control rod through a control bore hole and resulted in corrosion damage. I investigation concluded that the corrosion cannot be detected from outside elevator control rod. | |
| | This condition, if not detected and corrected, could lead to failure of the eleva control rod, possibly resulting in loss of control of the sailplane. | |
| | To address this unsafe condition, HPH spol. s r.o. published Service Bulletin (SB): G304CZ-06a), G304CZ17-06a), G304C-06a), providing instructions f elevator control rod inspection and replacement. | |
| | For the reasons described above, this AD requires accomplishment of a one time inspection of the elevator control rod in the vertical fin and replacement with an improved control rod if control rod without drainage hole is used. | |
| Effective Date: | 14 May 2012 | |

EASA Form 110 Page 1/2

EASA AD No.: 2012-0073

Required Action(s) and Compliance Time(s):

Required as indicated, unless accomplished previously:

(1) For all sailplanes identified in the Applicability section of this AD, except those identified in Table 1 of this AD, no later than in 30 days after the effective date of this AD, inspect the elevator control rod in the vertical fin in accordance with Action 1 of HPH spol. s r.o. SB: G304CZ-06a); G304CZ17-06a); G304C-06a), as applicable to sailplane model.

Table 1

| Sailplane model | s/n |
|---------------------|--------------|
| Glasfügel 304 CZ-17 | 26-17, 70-17 |

Note: The sailplanes identified in Table 1 of this AD have already been inspected and, where necessary, corrected; only paragraphs (3) and (4) of this AD apply to these sailplanes.

- (2) If, during the inspection as required by paragraph (1) of this AD, any discrepancy is found, before next flight, replace the elevator control rod with an improved part in accordance with Actions 2, 3 and 4 of HPH spol. s r.o. SB: G304CZ-06a); G304CZ17-06a); G304C-06a), as applicable to sailplane model.
- (3) For all sailplanes identified in the Applicability section of this AD if equipped with control rod without drainage hole, within the time specified in Table 2 of this AD, as applicable, replace the elevator control rod in the vertical fin with an improved part in accordance with Actions 2, 3 and 4 of HPH spol. s r.o. SB: G304CZ-06a); G304CZ17-06a); G304C-06a), as applicable to sailplane model.

Table 2

| Sailplane configuration | Compliance time |
|--|--|
| Equipped with a rubber bellows on the top of the vertical stabilizer | Within 8 months after the effective date of this AD |
| Not equipped with a rubber bellows on the top of the vertical stabilizer | Within 20 months after the effective date of this AD |

(4) After replacement of the elevator control rod in the vertical fin on a sailplane, as required by paragraph (2) or (3) of this AD, as applicable, do not install an elevator control rod without a drainage hole on that sailplane.

Remarks:

- 1. If requested and appropriately substantiated, EASA can approve Alternative Methods of Compliance for this AD.
- The required actions and the risk allowance have granted the issuance of a Final AD with Request for Comments, postponing the public consultation process after publication.
- 3. Enquiries regarding this AD should be referred to the Safety Information Section, Executive Directorate, EASA. E-mail: ADs@easa.europa.eu.
- For any question concerning the technical content of the requirements in this AD, please contact: HPH spol. s r.o. Čáslavská 126, P.O. Box 112,

28401 Kutná Hora Czech Republic
